

**Hi Everyone! There are usually lots and lots of bed questions. So with the hope of answering the majority of them in one place, here goes...**

## ▶▶ TWIN XL BEDS

Beds in all halls are XL twin (except Cypress & Keys) and raise to a maximum clearance of 31" - 35" (high enough to fit most mini-fridges). Bed heights can be adjusted. Request your bed height adjustment at <https://iservicedesk.housing.ufl.edu/>.

When raised to the highest setting, the clearance under the bed is 31" - 35". If you add in the mattress and bed frame, the height of the bed is about 44". In many multiple occupancy rooms (doubles, triples, et cetera), some beds can be bunked if requested via <https://iservicedesk.housing.ufl.edu/>.

## ▶▶ LOFTS

The following halls have beds that can loft:

- Broward
- Jennings
- Simpson
- Buckman
- Fletcher
- Sledd
- Weaver
- and North Halls.

Beds in other halls cannot be lofted. Students cannot modify or add to any bed on campus (no risers, blocks, or loft kits). Request your bed height adjustment at <https://iservicedesk.housing.ufl.edu/>.

## ▶▶ INFINITY HALL

There are loft kits available at Infinity Hall available on a first come, first served basis. Just submit a request here <https://iservicedesk.housing.ufl.edu> right after moving in.

## ▶▶ CYPRESS HALL

This hall has XL full-size beds. Lofting or raising the beds is not allowed. There is less than 12" clearance in Cypress.

## ▶▶ KEYS COMPLEX

This hall has XL full-size beds. Lofting or raising the beds is not allowed. There are drawers under Keys beds.

**WHERE GATORS LIVE.**

**Since we didn't order all 8,000+ beds at the same time, there may be slight variations but generally speaking, this should cover most areas.**
